

The nature merges with the human knowledge
to improve the quality of our lives

MISSION

We are a company made up of people with the skills, with the spirit of initiative and with a great enthusiasm that desire to achieve excellence. For us it is important to go for a long journey without limits or boundaries, but always moving forward step by step.

HISTORY

In 1999, the BRYMORE SPA (a San Marino chemical company) decided to create a special business sector that would have dealt with the production of cosmetic, optics and disinfectant products. In 2008, this business unit was sold to some businessmen, closely linked to Brymore, that made it an independent company by creating the ONE MORE SRL. The new company kept the people who worked in the previous corporate sector, the operational know-how and customer base. Over the years, the ONE MORE SRL has developed new products through new technologies and investments in Research and Development and has therefore increased its clients presenting itself both as a production and as a commercial company. In recent times, with the entry of new entrepreneurs and as a result of a complete internal re-organization, the ONE MORE SRL has severed all ties with the past and puts itself in the market as an innovative, dynamic and modern productive reality.

INTERNAL ORGANIZATION

ONE MORE is organized with the following departments: Administration, Accounting, Commercial, Research and Development Laboratory, Production, Packaging, Warehouses

In addition to these internal departments makes use of the collaborations:

- An Italian laboratory of national importance for microbiology, safety and research
- A cosmetics laboratory of a leading Italian University

PRODUCTION LINES

A Technical Director and a Research and Development Lab oversee all of our production processes as well as packaging processes that take place in the following lines:

- turboemulsifiers of different sizes
- 2 automatic lines for filling and packaging of vases and bottles
- 2 manual lines for filling and packaging of vase and bottles
- 1 line with the automated heat sealer for filling tubes

COMMERCIAL OFFER

• CORPORATE BRANDS

Some corporate brand lines like GELLYGEN (disinfectant and sanitizer gels), BRYGEL (gels and sprays for ultrasound or ECG), MASSAGE BALM (massage creams), are sold in multiple formats and versions both in Italy and in Europe.

• PRIVATE LABELS

The Private Labels (or private label products) have been developed mainly for Italy and for Northern Europe in different markets (personal care, pharmaceutical, pet care) and in multiple distribution channels (Retail, Supermarkets, Discounts, Specialty, and others). We offer our customers various services such as: filling or packaging, making products based on their formulas, or the designing and developing of brand new products through our Research and Development laboratory.

• PROMOTIONAL ITEMS

We are also in the market of the Promotional Items for the pharmaceutical companies. Our offer includes products we produce (cosmetics, personal care, disinfectants, sanitizers) or marketed products (whether articles for medical use, paramedical use or gadgets).
